

THE MISSION

The mission of the foundation Registracion di Companianan di Construcccion is to create a safe, fair, and responsible environment in the construction sector of Aruba.

We would like to see construction companies work honestly and safely, act responsibly with their employees, comply with laws and regulations, and contribute to the Aruban economy. By obtaining the RCC label, construction companies can show that they comply with the obligations of the Aruban legislation, are financially healthy and take responsibility for the safety of their employees. And it helps clients make a responsible choice when looking for the right partner for their project's needs.

Fundacion RCC started in 2020 and we would like to update you about our status and invite you to become registered (again)!

LOOK BACK / LOOK FORWARD!

NEWSLETTER 2022

In 2020 we started, in 2022 we have gained a strong position in the stakeholder market on Aruba. We would like to inform you about some of the achievements in the last year.

We kindly invite your company to register again for the Fundacion RCC label 2023!

We are looking forward to 2023!

The board

Rignald Martis, Jossy Figaroa, Frank Heitkonig, Haydy Obispo, Serge Thijssen

Support

Michiel van Ewijk, Rob Timmers

CREATING CHANGE

INVOLVING THE WHOLE CHAIN

AHATA, SOGA, FCCA are working on adjusting their tender policies to stimulate (sub)contractors to gain the RCC label.

SUPPORTED BY THE GOVERNMENT

Minister Geoffrey Croes, director of Economic Affairs Mrs. M. Pita-Dijkhoff and DOW-director M. Croes support our idea and we're currently finding ways to strengthen our cooperation. We need the government to proactively propagate our vision and we are working hard to achieve that. Together we will make a change!

THE FOUNDATION IS IMPROVING ITSELF

We are critical, also to ourselves. Therefore, we decided to start establishing a Supervisory Board; to make sure our General Board is supervised and improving.

BECOME OR STAY PART

We have and feel the energy. We are eager to make a change in the market and reach our goal of creating a fair competition in the industry (and further chain) market in Aruba.

Now we have the support of employer-associations, contractors and politicians and building our own structure in terms of a formal Supervisory Board, 2023 will be the year of scaling in terms of organization obtaining our RCC-label. We need you to stay part of our community and register again for 2023.

INTRODUCING 'RCC-ASPIRANT'

To easily giving smaller and starting companies the opportunity to obtain the RCC label we've introduced 'RCC-Aspirant'; without lowering our standards giving a broader spectrum of companies the opportunity to join our community!

SPECIAL THANKS

To our partners for their continuous support and trust in RCC: ATIA and [bpo caribbean](#)

"Supporting a foundation like RCC that is registering construction companies, not only levels the playing field, but also creates assurance for the customers that the affiliated companies will deliver top quality work while complying with all local rules and regulations."

- Herrick Henriquez, director ATIA -

'I feel more and more companies, associations and the government are recognizing Fundacion RCC. This is giving us the trust and energy to keep working towards our goals.'

- Rob Timmers, RCC co-founder and coordinator -

"We are working hard to achieve an economic playing field on Aruba, in which every construction related company has a fair and equal chance of succeeding, thereby we are creating value for the Aruban community"

- Rignald Martis, RCC President -
